COVID-19 Vaccines: The Realities of the Next Steps

Logistics and Supply Chains

Julie Swann, PhD

Supply Chain Management

- **Interconnected systems with autonomous decision-makers**
- **System plans and manages flow (of product, information, people)**

Supply Chain Management

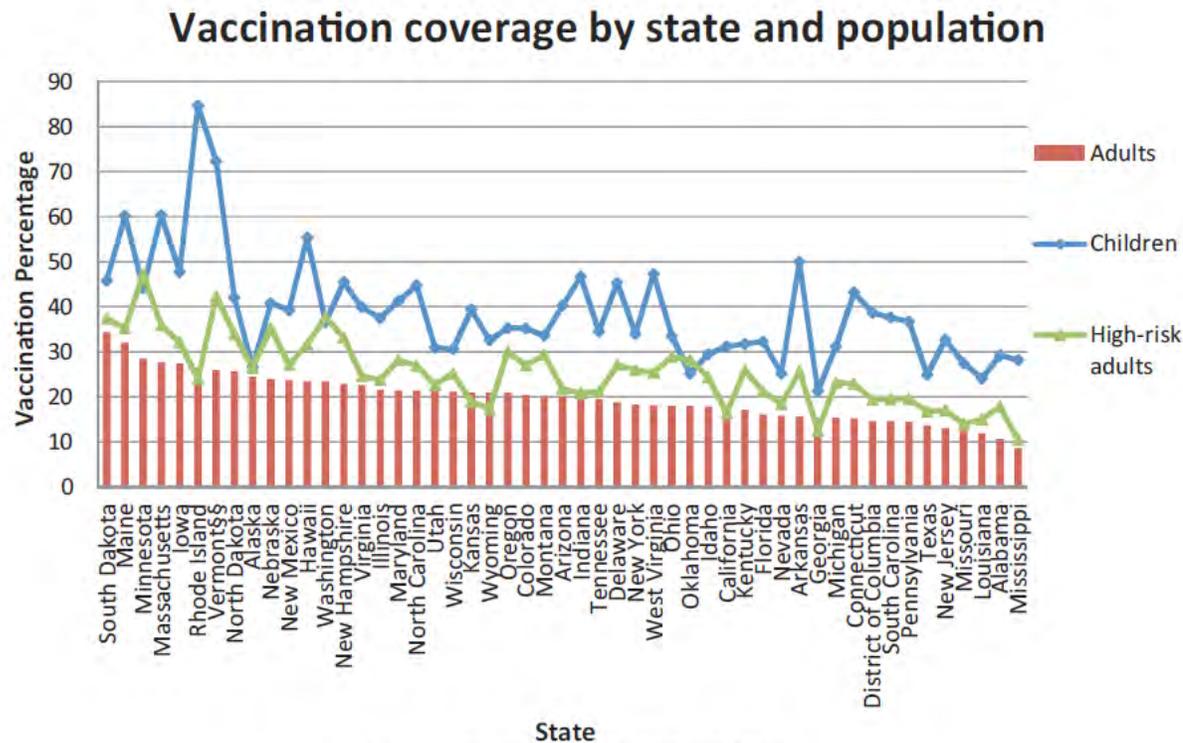

- Interconnected systems with autonomous decision-makers
- System plans and manages flow (of product, information, people)

Typical goal: Right Product, Right Place, Right Time, Right Customer, Right Cost

Learnings from H1N1 Distribution

C. Davila-Payan et al. / Vaccine 32 (2014) 246–251

Source: MMWR 2010;59(12):363-8 [2]

- Vaccine coverage higher with
 - Shorter leadtime of “Allocation to Shipment” from DC
 - More vaccine to locations with broad access (e.g., pharmacy, clinics)
- System can also benefit from inventory visibility

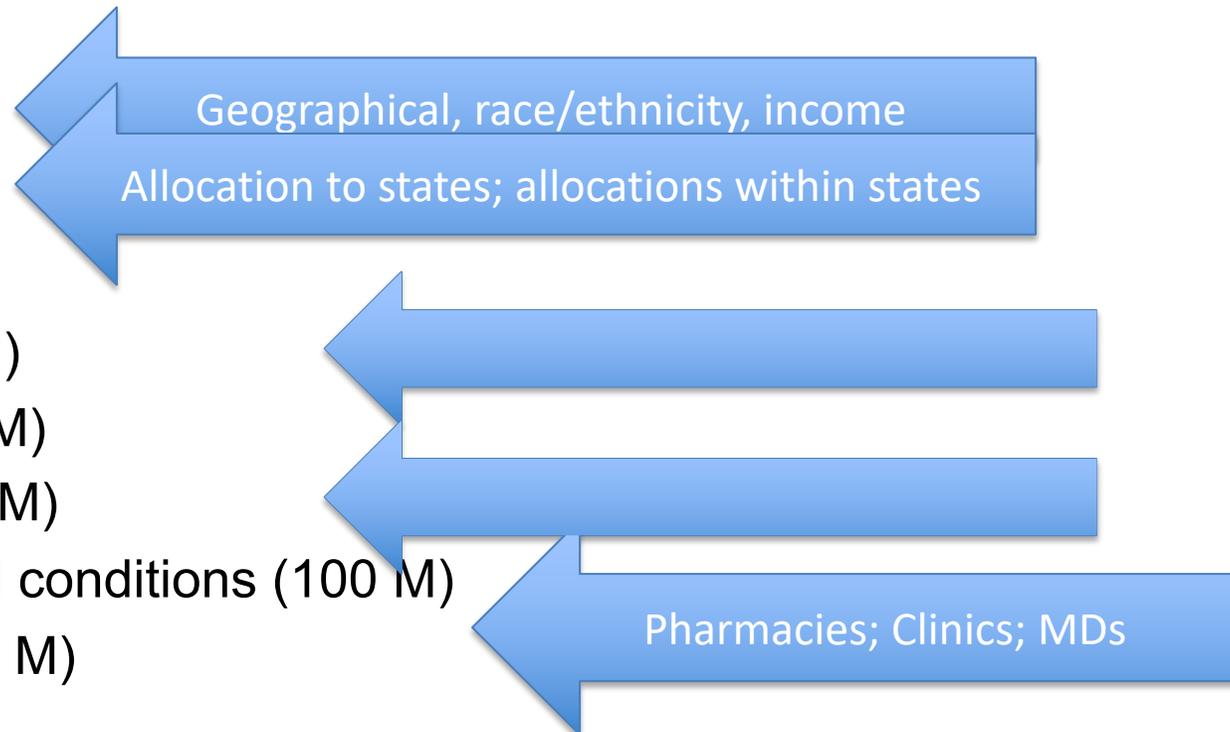

Davila-Payan et al. Vaccine

Li et al / PLoS One 2018 Oct 25;13(10):e0206293.

doi: 10.1371/journal.pone.0206293. eCollection 2018.

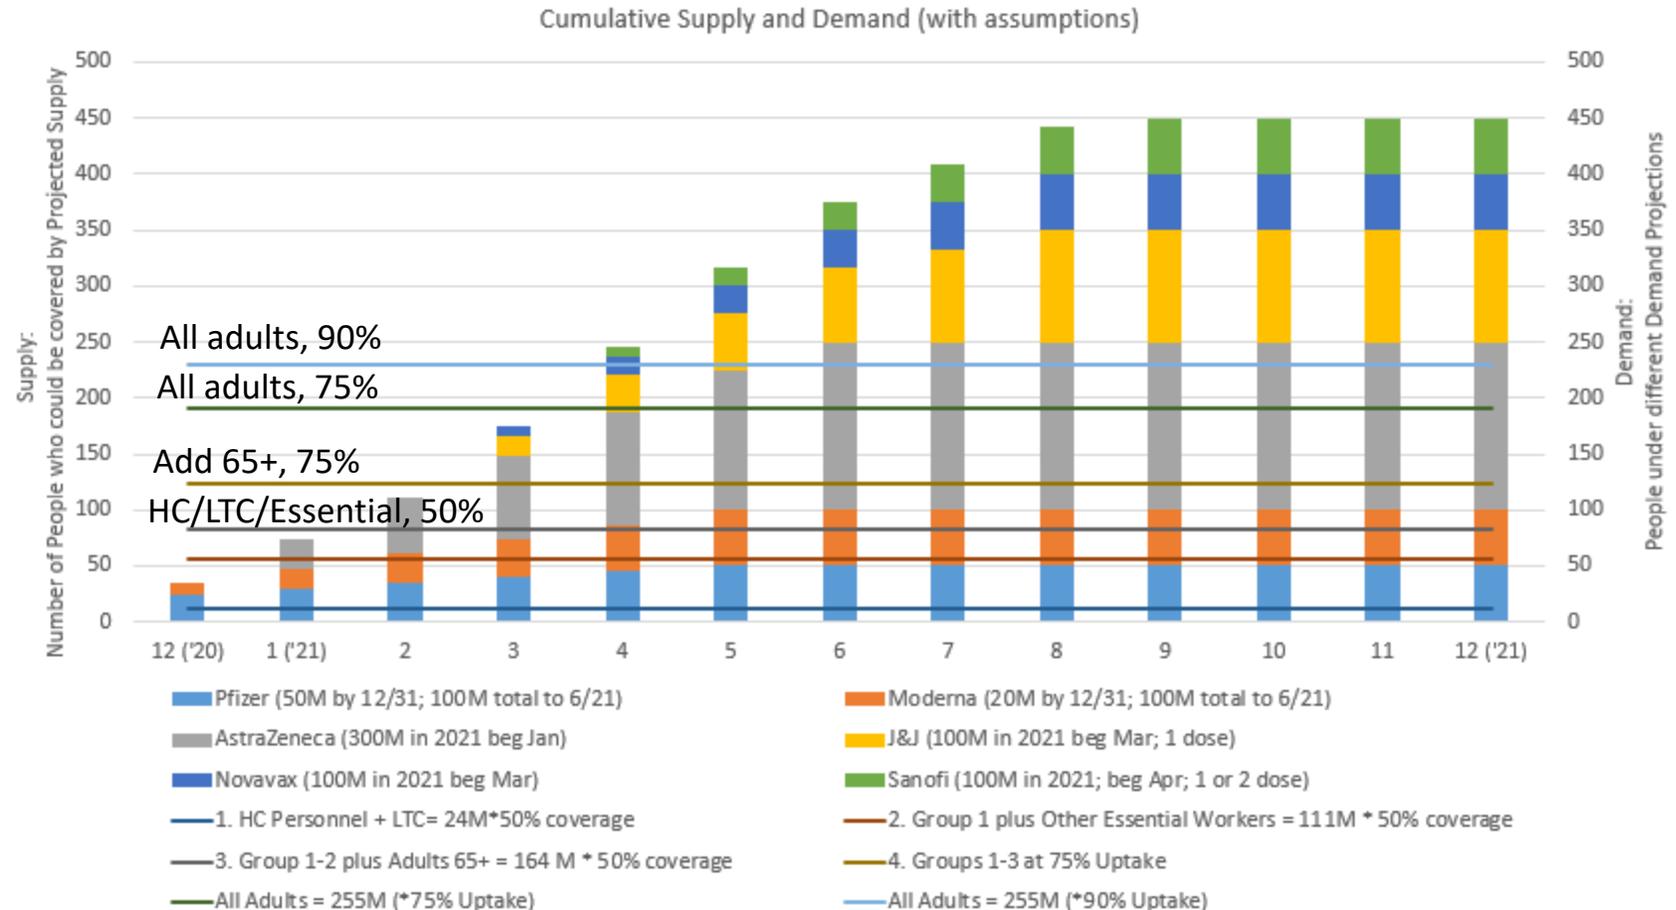

Vaccine Allocation Planning (ACIP, 11/27/2020)

- Principles
 - Maximize benefits and minimize harms
 - Promote justice
 - Mitigate health inequities
 - Promote transparency
- Example groups
 - Health care personnel (21 M)
 - Long-term care residents (3M)
 - Other essential workers (87 M)
 - Adults with high-risk medical conditions (100 M)
 - Adults aged ≥ 65 years (53 M)

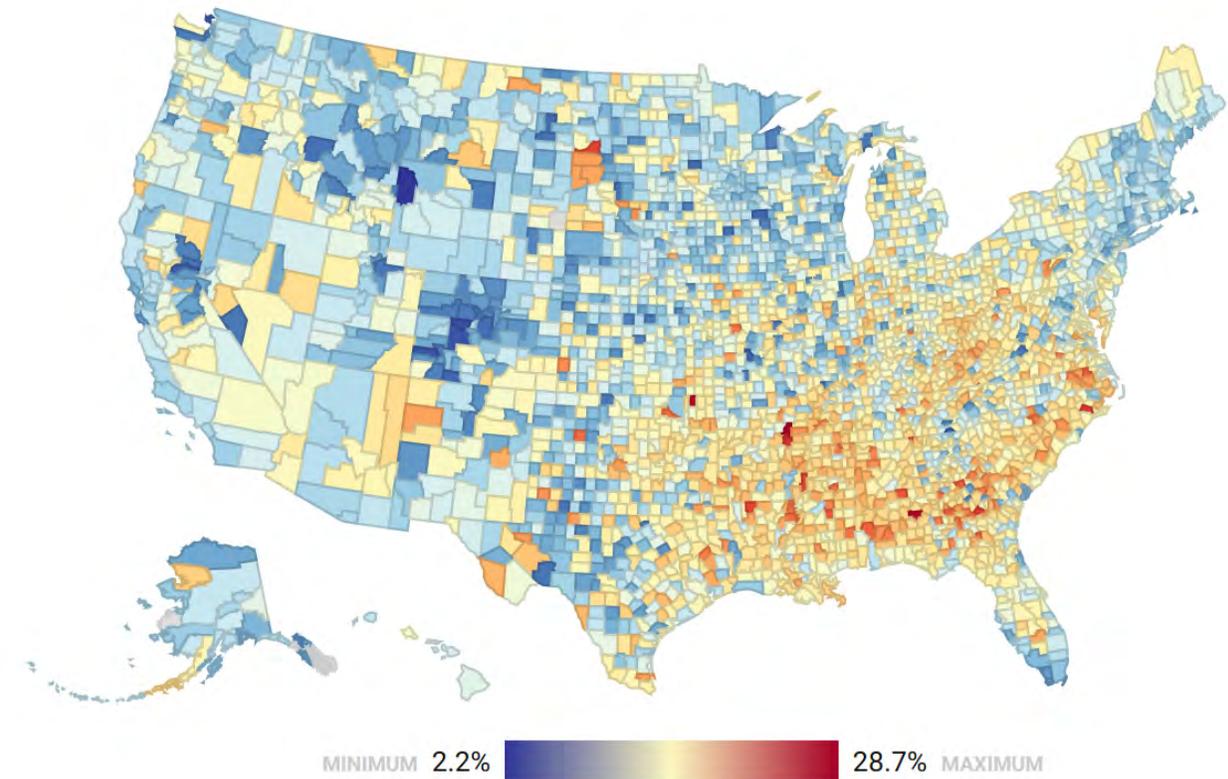

Supply and Demand in Person Coverage (Projections)

- Supply:
 - Vaccine commitments by US, over 6 months, start date estimated
 - Adjusted by coverage doses
- Demand:
 - Priority groups, varying uptake

Logistics and Distribution to Reduce Inequities

- Map shows diabetes prevalence by county
- Wide range of county values
- High rates among communities of color
- Vaccine hesitancy could be high in same areas

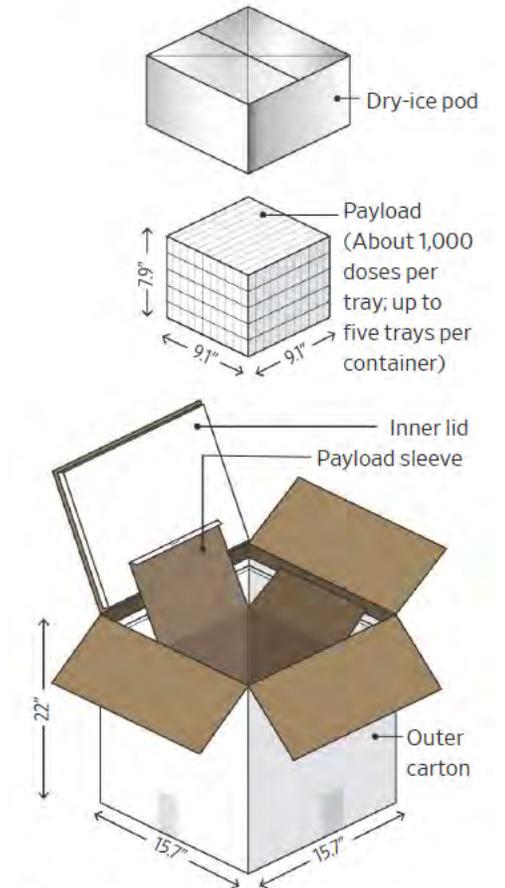

https://www.usnews.com/news/healthiest-communities/coronavirus-data/diabetes-prevalence?chart_type=map (from CDC)

Vaccine Specifications

Vaccine	Storage Temp (Celsius)	Dosing (preliminary)	Other	Shipment
	Store at -70 C; 10 days in box; re-ice every 5 days; total of 30 days		1 st to ship; Box holds ~1000 to 5000 doses	Pfizer to providers
	4-8 C			
Johnson & Johnson	4-8 C	1 dose only		“ ”

Shipper contents

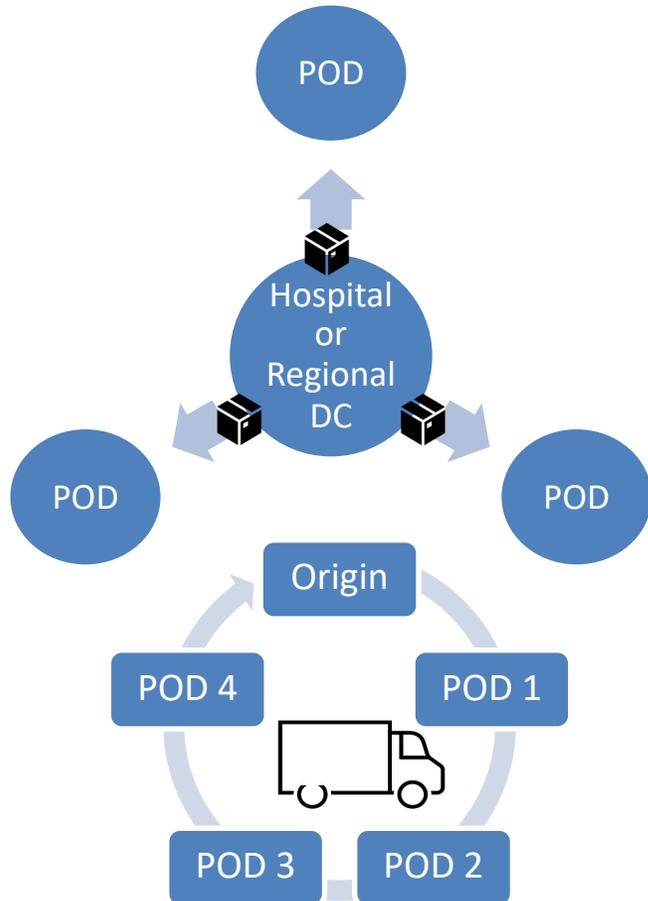

Note: -70°C = -94°F.

Strategies additional to Direct-to-Provider

PUSH supply out to
Points of Distribution

PULL people in to
central location

PARTNER with
commercial pharmacies

Walgreens Locations (CVS similar)

COVID-19 Simulation Integrated Model (CovSim) to Inform State and Local Levels

- Dr. Julie Swann, jlswann@ncsu.edu
- <http://go.ncsu.edu/covsim>
- Modeling and Public Health Team
 - NC State, UNC-Chapel Hill, Georgia Tech

Modeling team has support from NC TraCS system & NC State ORIED; NSF RAPIDs, CDC/CSTE for state modeling
